

# Computer Systems & Information Technology

**Instructor:** Brian Simmons  
**Location:** NTCC (Bean Center)  
**Rooms:** T-204/T-207

## About the Program

### IT Drives Our Global Economy

Despite their differences on the surface, virtually every industry today depends on IT. From small, family-run businesses to big corporations, there are IT careers for students in almost every organization around the globe.

CompTIA certifications can launch your career and keep you on a growing path. Because these certifications are so widely recognized in the industry, students who get certified find their credentials to be an essential part of their career success.

### There's a Career in IT That's Right For You

Our digital world is expanding so quickly that it's creating IT jobs and openings faster than the right people can be found to fill them. Indeed.com estimates that there are almost 2,000,000 unfilled IT jobs globally in a variety of industries. No matter what your interests, there is a IT career path that is right for you.

### It Pays to Be in IT

Besides having low unemployment levels, IT jobs pay well with salaries that are significantly higher than the national average. The outlook is good, too: According to the U.S. Bureau of Labor and Statistics, the availability of IT jobs is projected to grow by 17% through 2022.

### Stand Out From the Crowd

A CompTIA certification gets you ahead of the crowd immediately: Not only can you count on the skills you earned, you also validate your knowledge. Having a certification in your hand boosts your resume and is an increasingly compelling credential when you're applying for a job. Certified IT respondents are more likely to hold CompTIA certifications than any other.

### About the Instructor

Brian Simmons is the founder and proprietor of Compute-This!, a successful computer service business serving customers in Callahan and surrounding areas. He has been in business since 2003 and has helped thousands of business and residential customers with their computing needs. In 2013 his business was awarded Small Business of the Year by the Greater Nassau County Chamber of Commerce. As an experienced computer technician, he is excited about the opportunity to pass along the many lessons he has learned about computer hardware, software, and networking to Nassau County's next generation. Simmons has experience in teaching digital media, journalism, mathematics, and entrepreneurship and marketing.
